

AUTO GREASING

Greasing is a fundamental function for any mechanical structure with high forces, stress or load.

Because of greasing Finn-Power machines have the best accuracy, repeatability and lifetime in the world.

Automatic greasing saves time and ensures constant work flow without interruptions. Automatic greasing extends the service interval. For automated lines auto greasing is a must.

Greasing reduces friction and ensures that maximum capacity is always in use. Greasing interval is adjustable.

Requirements:

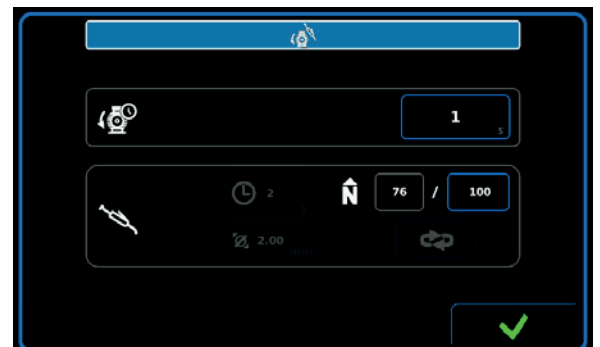

- Air pressure

Notes:

- Always use genuine Finn-Power grease
- Grease for food related industries also available

AVAILABILITY	
SERIAL	FP20, FP120, FP140, FP145
HEAVY DUTY	FP160, FP165, FP170, FP175, KC800, KC1200, KC2000
SIDE FEED	SP100, SP350, SP1200
NUT & CABLE	NC20, NC30, NC40, NC60, CC22, CC24, CC26
